

# Country Inn and Suites

## Grand Forks, North Dakota

**Electrical Construction:** \$650,000

**Year Completed:** 2008

**Project Manager:** Steve Wasvick

**Architect:** ICON Architects

**General Contractor:** JTC Construction

**Owner:** Portage LLC

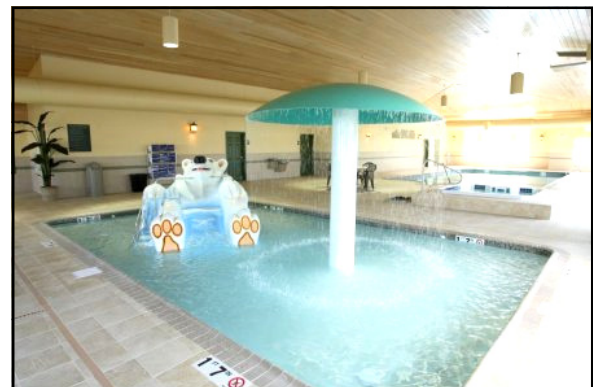

This four floor, 101 room hotel includes a pool, fitness center, community room, business center, and high speed wireless internet access.

Bergstrom Electric was hired as a sub-consultant to JTC Construction and handled all of the electrical construction on the project. Bergstrom crews installed a 2000 amp/208 volt 3 phase main electrical service, along with approximately 50,000 feet of conduit, 203,000 feet of wire, and 1,098 light fixtures.

Despite the fast-paced construction schedule and starting work in winter weather conditions, the project went very smoothly. According to officials at Country Inn & Suites, it was “the

smoothest opening we’ve ever had.”

It took approximately 9,500 man-hours to complete the electrical construction. Crews started in December of 2007 and the project was complete by July of 2008.
