Bergstrom Electric
Attention: James Schmidt
100 2nd Avenue North
Devils Lake, ND 58301

Re: Turtle Mountain Replacement High School
Belcourt, North Dakota

Dear James;

I am writing you in regards to the above referenced project. Being the Project Manager on the new Turtle Mountain Replacement High School, I would like to express my sincere satisfaction having worked with Kendrick Kjorsvik, you and Bergstrom Electric as a whole. The 120,000 SF, \$21,000,000 Replacement High School Project is truly a modern, 21st century, functional model for education. In addition the project was the first ever LEED project in North Dakota and is currently in the process of attempting Silver Certification by the USGBC.

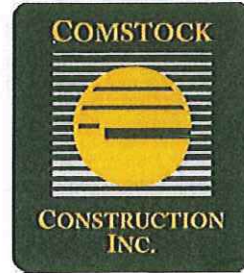

This project required weekly coordination meetings with Owner's representatives, Design consultants, and Contractors who met to coordinate work, identify potential conflicts, review schedule, discuss potential changes and to make plans for the coming week. It was at these meetings that I experienced the strengths and professionalism of Ken. His understanding of electrical systems and the required coordination were key components in achieving a successful project. Whenever a problem or a concern about the electrical needs was discussed, the response by you and/or Ken was always, we will see what we can do and it always was done right.

A big "thank you" to "Bergstrom Electric", both the company and their personnel, especially Ken, they gave us excellent workmanship, dedication and pride. The positive attitude kept showing through the entire project. It has been said that before that a company can tell the success or failure of their past performance on previous jobs based on whether or not they have repeat business on future jobs. That being said I look forward to working with Bergstrom Electric again in the future given the level of expertise shown on this project.

Respectfully

Kevin Koppang
Project Manager
