CONSULTING ENGINEERS

Bergstrom Electric, Inc.
Hwy. 81 North, Box13152
Grand Forks, ND 58208-3152

Dear Cliff,

We enjoyed working with the Design Build Team of Bergstrom Electric, Inc. on the Marvin Windows Plant in Grafton, ND. With a team effort on both our parts this project came together with great ease. This was an interesting but challenging project due to the scheduling and complexity of the overall plant.

With the flood that wiped out your office and ours and the job-site we were off to a difficult but challenging start. Through it all we prevailed and opened the plant a month earlier than scheduled. Only a well-organized team like Bergstrom Electric's could organize and implement such a schedule. The project involved numerous electrical systems with each being a separate entity to detail. Bergstrom Electric did an excellent job at meeting these challenges and completing the project.

The staff at Schaff Engineering would like to thank the Design Build Team of Bergstrom Electric and all others involved for always being one step ahead of a very difficult situation. Their knowledge and ability to foresee problems was a plus to getting this project done with little difficulty. We look forward to working with Bergstrom Electric, Inc. and their Design Build team again on many future projects.

Sincerely,

Leonard (Red) Schaff, P.E.
